Appendices

Appendix 1 - Site Layout Plan
Appendix 2 - BMAP extracts/ previous approved drawings
Appendix 3 - Speed survey report

PART A: GENERAL

Application Details Name, address, telephone/email	Blakiston Houston Estate, c/o agent
Agent Details Name, address, telephone/email	Clare McParland Bell Rolston The Corner House 183-185 Ballyclare Road Newtownabbey BT36 5JP
Development details Brief description of development proposal	This application seeks an industrial building to be used for anaerobic digestate managementon lands zoned for industrial development accessed from Carrowreagh Road, Dundonald. Solid digestate from Anaerobic Digestion (AD) plants in NI will be delivered to the site and blended with mineral fertiliser additives to produce 30000t of bagged and pelletised product per year. A site layout plan is enclosed in Appendix 1. The lands have previous benefited from outline planning permission for industry (T/2002/0554/O), in accordance with the zoning MCH 09 of draft BMAP. Extracts of BMAP and the previous planning approval are enclosed in Appendix 2. The approved access was from Carrowreagh Road. A speed survey has been undertaken on Carrowreagh Road to establish a design speed for the access, enclosed in Appendix 3. This confirmed 85th percentile speeds of 44mph in both directions. On this basis, and to serve the wider zoning, the access has been designed with splays of 4.5 x 120m in accordance with DCAN15.

With respect to the following questions answer yes or no

Is the development:	YES	NO
• Residential comprising 10 or more units		x
• Non-residential with a gross floor area of 500 sqm or more		x
• Likely to generate 30 or more vehicle movements per hour		x
• Likely to generate 5 or more freight movements per day	x	

If the answer to any of the above questions is YES, applicants MUST complete Parts B, C and D of this form also.

PART B: TRAVEL CHARACTERISTICS

1. How many journeys will be made to the site each day? Please provide an estimate of the number of journeys to the site by each transport mode, walk, cycle, public transport, car, taxi and freight vehicles.

The table below seeks to note the changes in traffic arising from this application. This is a commercial operation which relies on road haulage rather than agricultural vehicles. This assessment is based on 20t payload vehicles, operating five days per week ,50 weeks per year. Larger vehicles and a longer working week will reduce these daily movements.

Solid digestate from AD plants in NI will be delivered to the site and blended with mineral fertiliser additives to 30000t of bagged and pelleted product per year. In addition there are small volumes of consumables (450tpa of stabiliser, machine lubricants and parts etc.).

Activity	Annual tonnage	Daily
Digestate import	15000t	3 loads
Mineral additives import	15000t	3 loads
Product export	30000t	6 loads
Consumables/maintenance	-	<1 load
TOTAL		13 HGV loads
Staff and visitors		5

Ignoring potential efficiencies utilising the same vehicles to import and export material, it is estimated there will be 26 HGV movements per day, and 10 staff/visitor car movements per day, a total of 36 per day.

2. Will there be any peak times for traffic accessing the site? Please provide details.

No. The busiest periods at this facility will be the start and end of the day when staff arrive and leave.

The facility has the added benefit of removing seasonal traffic typically associated with the land spreading of digestate from the originating AD plants.

PART C: TRANSPORT IMPACTS

Describe below the transport impacts of the development. For example, consideration should be given to the effect on transport infrastructure, possible increased risks of accidents, busier junctions, increased parking in the surrounding area, noise generation, air quality and the effect transport may have on the surrounding townscape, landscape and natural and historic environment etc.
The level of traffic generated by this proposal is very low, much less than 60 vehicles per day. The access has splays of 4.5 x 120m, suitable for development in excess of 60 vehicles per day. This access is the access to the wider zoning, so has been designed to accommodate more than 60 vehicles per day. The layout plan notes two loading/unloading bays within the site, enabling HGVs to turn within the site. With existing hard standing for parking cars

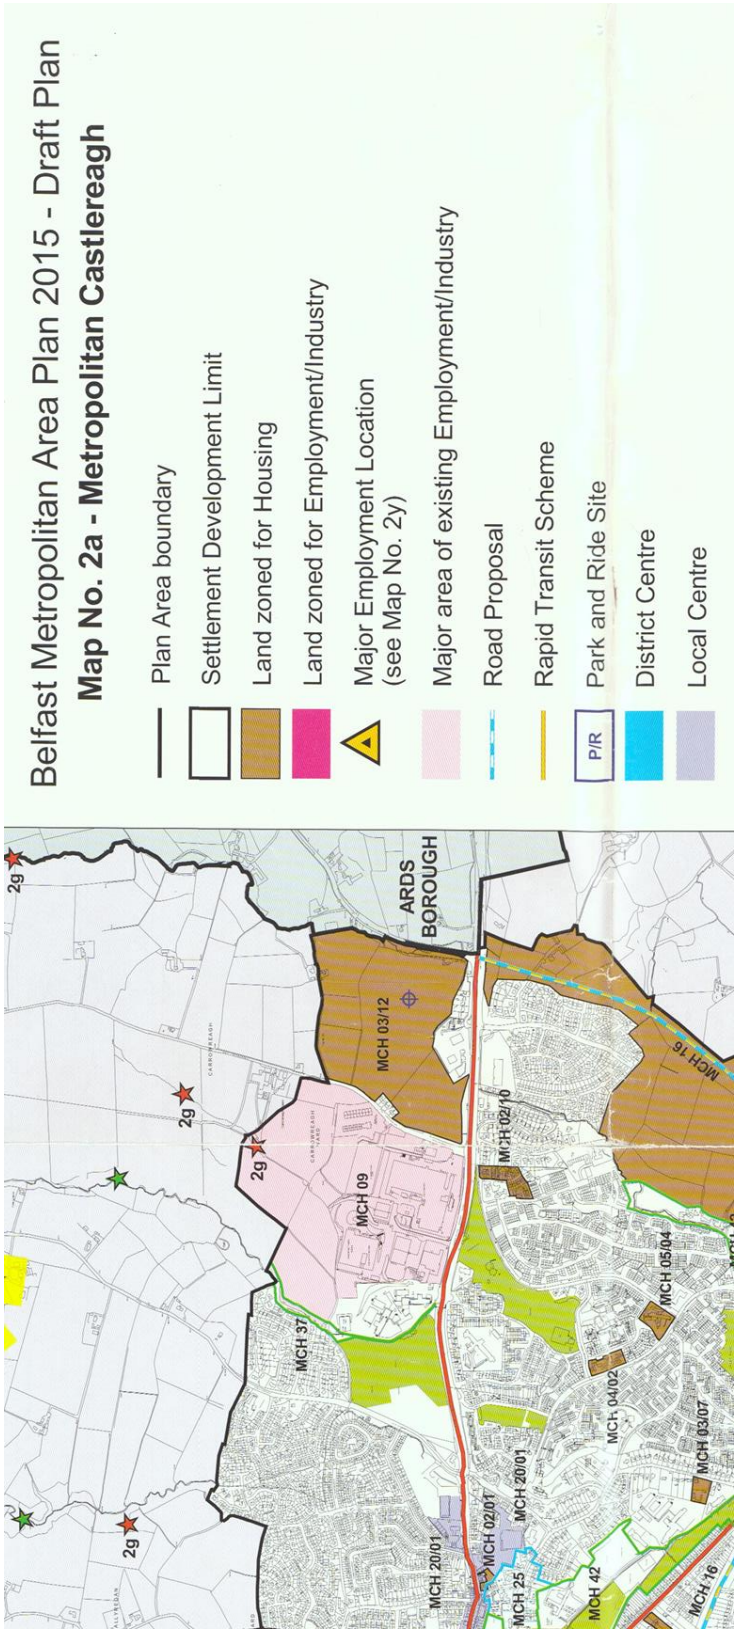

PART D: MEASURES TO MITIGATE IMPACTS/INFLUENCE TRAVEL TO THE SITE

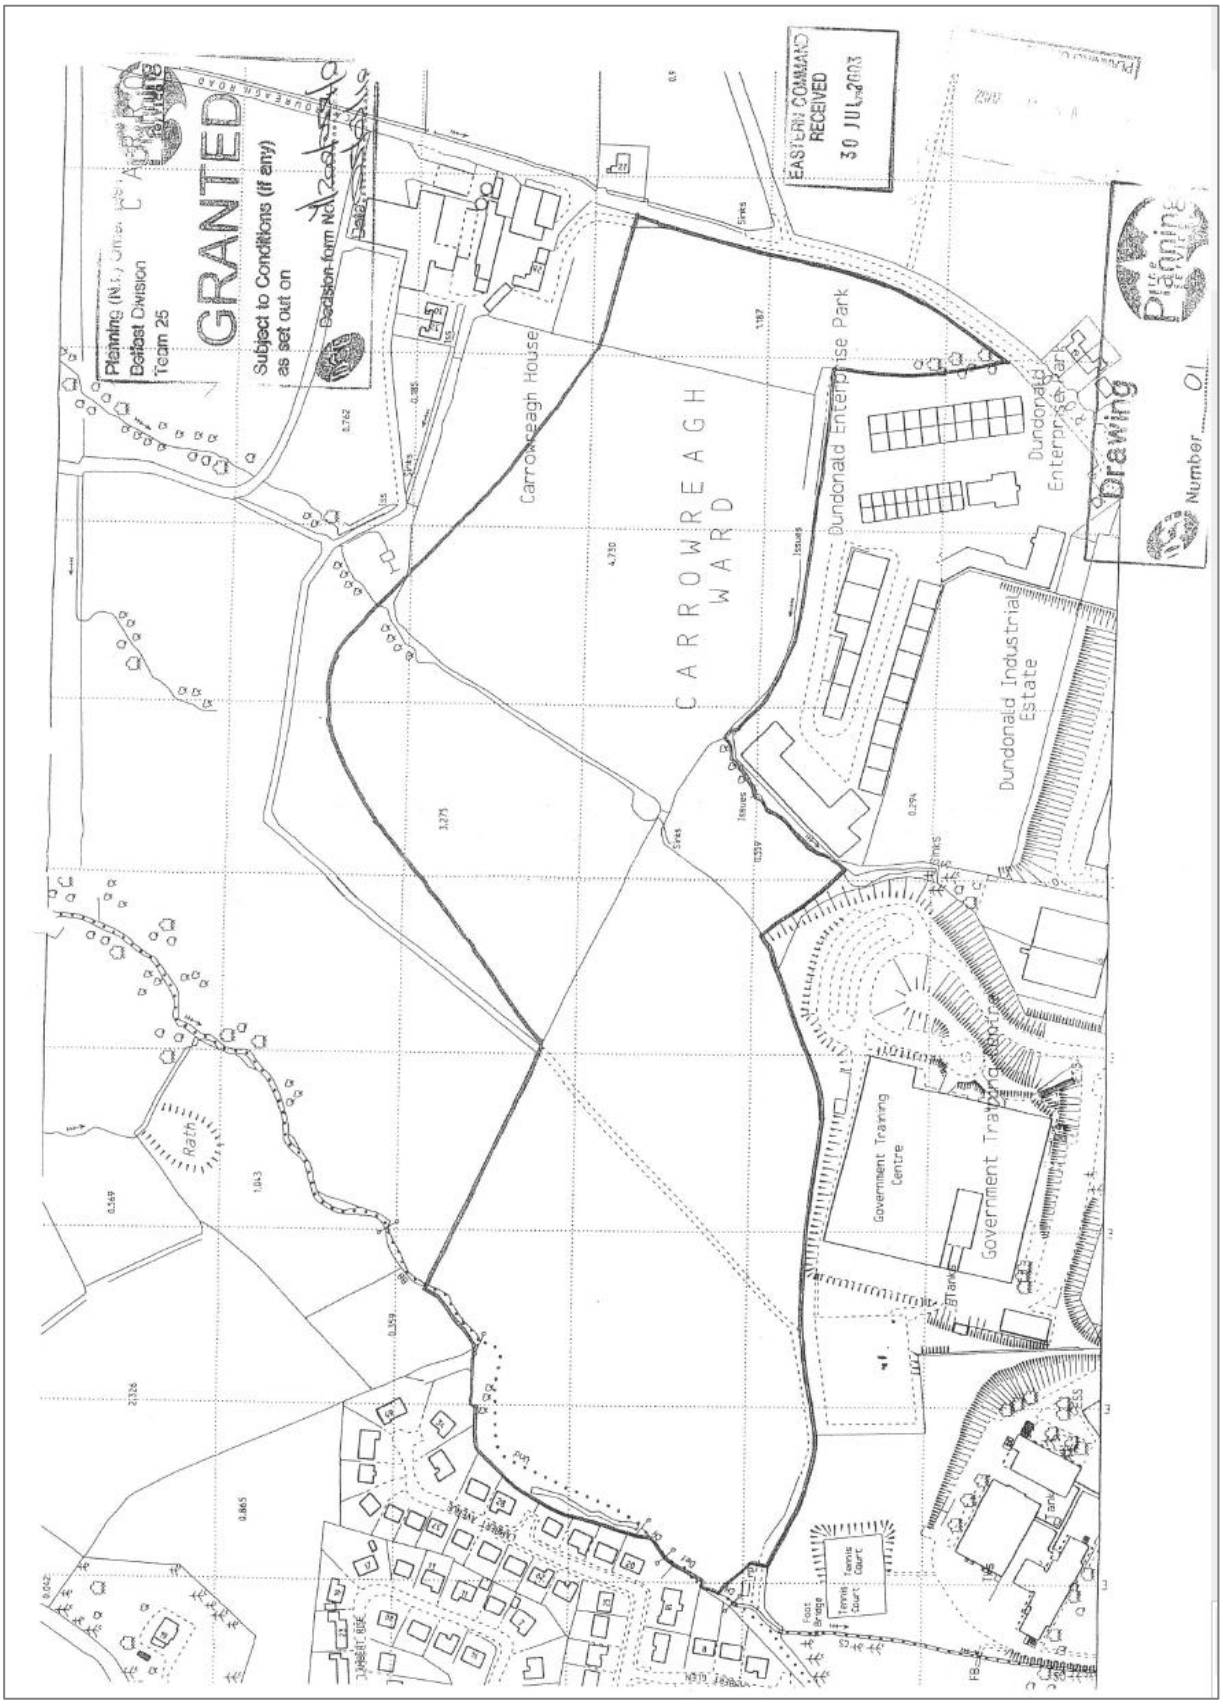

Describe below what measures will be taken to influence travel to and from the site and within it. For example, consideration should be given to promoting walking and cycling (eg. by providing pedestrian and cycle routes and crossings), encouraging the use of public transport (eg. improved services, new stops, better information), minimising car-parking provision, ensuring good access through design, providing facilities for people with mobility impairments, supporting travel initiatives such as car-sharing, ensuring minimal and efficient freight movement etc.
Freight movements will be minimised in the interests of fuel and time efficiency. Ideally a vehicle delivering digestate or additives could leave with a load of bagged pelletised product, reducing vehicles entering or leaving empty.

Appendix C – Traffic Survey Results

1.0 Introduction

MEA were commissioned by MRA Partnership on belhalf of BH Estates to carry out an automatic traffic surveys in Carrowreagh Rd, Dundonald to determine base line traffic information.

The proposal included the use of rubber tube counters in which sets of tubes are temporarily fixed to the road surface.

2.0 Traffic Survey Information

The survey brief was to collect traffic data on Carrowreagh Rd, Dundonald to determine baseline two-way flow, traffic composition and speed data during a 7-day period. The survey locations are shown below:

There were no accidents or incidents reported to the PSNI during the survey period. Transport NI confirmed that there was no planned road maintenance at the time of the survey.

The survey was initially undertaken in a period starting on Saturday 22nd June 2024 - Friday 28th June 2024.

Figures 1 – Survey Location Plan

The ATC results, in excel format are included in Appendix C and are summarized in the tables below.

2.1 - Traffic Volume

The survey data was recorded continuously over the survey period, allowing the daily volume over a 24hr period, 00:00 to 24:00 hrs on any given day. Table 1 summarises the daily volume of traffic at the survey site location. This data has been split into two channels of direction. Channel 1 is headed Southbound entering Dondonald. Channel 2 is headed Northbound exiting Dondonald.

Table 1 – Traffic Volume Result (Carrowreagh Rd, Dundonald)

Site 1	Traffic Volume 24hr, 00:00 to 24:00		
	CH 1	CH 2	Combined
Saturday 22nd June 2024	604	492	1096
Sunday 23rd June 2024	402	338	740
Monday 24th June 2024	989	617	1606
Tuesday 25th June 2024	1067	627	1694
Wednesday 26th June 2024	990	578	1568
Thursday 27th June 2024	950	591	1541
Friday 28th June 2024	906	608	1514

The survey data has been analysed in 60-minute intervals. Full detailed, analysed results are included in Appendix C.

2.2 - Peak Hour

The peak hour has been determined for the site based on the 24hr period daily and is summarized in Table 2 below for the combined flow.

Table 2 – Peak Hour Results (Carrowreagh Rd, Dundonald)

Site 1	Peak Hours	
	AM	PM
Saturday 22nd June 2024	11.00-12.00	12.00-13.00
Sunday 23rd June 2024	10.00-11.00	14.00-15.00
Monday 24th June 2024	08.00-09.00	16.00-17.00
Tuesday 25th June 2024	08.00-09.00	16.00-17.00
Wednesday 26th June 2024	08.00-09.00	17.00-18.00
Thursday 27th June 2024	08.00-09.00	16.00-17.00
Friday 28th June 2024	08.00-09.00	16.00-17.00

Full peak hour data is included within the full results in Appendix C.

2.3 - Traffic Speed

The survey recorded the traffic speeds and have been summarised in Table 3 for the combined flow.

Table 3 – Traffic Speed Results (Carrowreagh Rd, Dundonald)

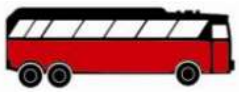

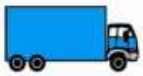

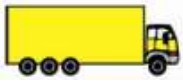

Site 1	85th Percentile Speed 24hr, 00:00 to 24:00 (m.p.h)		
	CH 1	CH 2	Combined
Saturday 22nd June 2024	44	44	44
Sunday 23rd June 2024	44	44	44
Monday 24th June 2024	44	44	44
Tuesday 25th June 2024	44	44	44
Wednesday 26th June 2024	44	44	44
Thursday 27th June 2024	44	43	44
Friday 28th June 2024	44	45	45

Full data of traffic speed including individual channel speeds are included within the full results in Appendix C.

Appendix A

Vehicle Classification Information

Vehicle Classification is based on FHWA Standardisation System for the classification of Vehicles.

Class	Description	Dominant Vehicle
1	Bicycle or Motorcycle	
2	Car/Car & Trailer	
3	Van	
4	Bus	
5	Two axle truck	
6	Three axle truck	
7	Four axle truck	
8	Four axle articulated vehicle or Rigid vehicle and trailer	
9	Five axle articulated vehicle or Rigid vehicle and trailer	
10	Six axle articulated vehicle or Rigid vehicle and trailer	
11	Five axle articulated vehicle or Rigid vehicle and trailer	
12	Six axle articulated vehicle or Rigid vehicle and trailer	
13	Seven or More alxes Truck & Trailers
